### EN 9100 - Quality Management in Aviation

**Duration:** 1 Day

**Language:** DE/EN

The EN 9100 standard “Quality Management Systems - Requirements for Aviation, Space and Defense Organisations” is an expansion of the ISO 9001 “Quality Management Systems – Requirements” standard, which is adapted for the special requirements regarding quality and safety in the aerospace industry.

In this training participants will be made aware of Quality Management practices, learn to identify the core requirements of the EN 9100 standard and how to apply these requirements to their organisations working practices.

#### Contents:

- ❖ The Basics of Quality Management in the aerospace industry
