SYSTEM/DESIGN ENGINEER FULLTIME/PARTTIME (M/W/D)

We are an innovative engineering company with a focus on technical product development and consulting as well as training for aerospace companies. Our expertise lies in the development of safety-critical components as well as in the build-up and operation of aeronautical companies. In the product development process, our focus is on the conceptual design, development, and verification of product ideas through prototype production to serial production readiness. Additionally, we use our company owned aircraft to offer flight campaigns and payload demonstrations.

We are looking to hire highly motivated engineers to reinforce our team. Flexibility, social skills, and a solid understanding of technical matters is more important to us than years of working experience. We work in a highly dynamic environment with a great variety of challenges, which means that our engineers are not limited to the technical aspects of our projects, but also involved from the management side. If you like to work recurrently in only one particular subject, we are not the right company for you. However, if you like to think outside the box and see the big picture, you will be spot on with us.

Your tasks:

- ❖ Independent execution of projects in the areas of systems engineering, safety engineering and quality management
- ❖ Product development, from the concept phase to serial production readiness
- ❖ Preparation and execution of workshops and trainings for our clients
- ❖ Participation in the shaping of our start-up

What you offer:

- ❖ Degree in Aerospace Engineering, IT, Mechanical Engineering, or a similar field
- ❖ A solid understanding of technical matters
- ❖ You are willing to and enjoy familiarizing yourself with new topics
- ❖ Teamwork and communication skills, internally as well as with our clients
- ❖ Fluent in written and spoken English

What we offer:

- ❖ An exciting working environment with a wide range of tasks
- ❖ Fair, performance-related pay
- ❖ A pleasant workplace with a small team in a family-like atmosphere
- ❖ Fully flexible working hours with the option for a high proportion of home office work

Start date: immediately

Duration: indefinite

Working hours: 20 to 40 hours per week
